WORK EXPERIENCE

Razhia

Jul. 2023 – Present

Game Developer

Qazvin, Iran

- Designed and implemented core gameplay systems—hidden object mechanics, city builder map, and conversation trees for the “*Karagah Alavi*” project, which reached over **20,000** downloads.
- Conceptualized and coded “*Raz Vazheh*” a Farsi word puzzle game in Unity, achieving **5,000+** downloads within the first month due to targeted marketing in Farsi-speaking communities.
- Integrated multiple mobile SDKs (analytics, monetization, IAP), contributing to improved player engagement and retention across live games, with measurable boosts in session duration and revenue.
- Designed and developed the word game Raz Vazheh, handling all UI and programming independently.

Joyixir

Oct 2020 – June

2023

Game Developer

Tartu, Estonia

- Created 40+ hypercasual, casual, and hybrid mobile games using Unity and C# several of which were published by top-tier publishers (Voodoo, Supersonic, Moonee), leading to rapid iteration, successful market testing, and the hit game “*Couples Yoga*”.
- Maintained and improved Joyixir’s top-performing local games by refactoring gameplay systems, enhancing UI/UX, streamlining build processes, and conducting thorough playtesting to ensure polished, high-quality releases.
- Created and optimized custom shaders and VFX, significantly improving visual fidelity while maintaining runtime performance across multiple game projects.
- Built custom editor tools for designers and artists, reducing iteration time by 30% and accelerating content production workflows.

Ordibehesht Studio

April 2018 – June 2020

Technical Artist & Game Developer

Karaj, Iran

- Designed and implemented optimized shaders and VFX in Unity (Built-in and URP), improving mobile game visuals without sacrificing performance.
- Created efficient 3D models and textures using Blender, Houdini, and Substance Painter, contributing to visually polished and lightweight assets.
- Automated asset and material workflows for the art team using Python and C# editor scripts, reducing repetitive tasks and accelerating delivery.

Pensor

Jan 2016 – Feb 2018

3D Artist & Motion Designer

Qazvin, Iran

- Produced engaging motion graphics for advertising campaigns using After Effects and Cinema 4D, contributing to increased brand visibility and client satisfaction.

EDUCATION

Islamic Azad University

September, 2017

BS, Computer Science

Qazvin, Iran

SKILLS & INTERESTS

▪ Skills:

- **Game Development (Unity):** C#, Gameplay Programming, UI/UX, DOTween, UniTask, ScriptableObjects, Addressables, Custom Inspectors
- **Graphics & Tools:** Shaders (URP/HDRP), VFX Graph, Shader Graph, Editor Tools, Materials, Optimization
- **Version Control:** Git (branching, merge, stash, releases), GitHub
- **Engines:** Unity (Advanced), Unreal Engine (Basic Understanding)
- **Art & 3D Tools:** Blender, Cinema4D, Maya, Houdini, Substance Painter
- **Others:** Problem Solving, Team Collaboration, Agile (Scrum), Mobile SDK Integration
- **Soft Skills:** Collaboration, Team Work, Autonomous.

Projects

- [Karagah Alavi](#) Narrative puzzle game with a hidden object section and city builder (Unity, C#)
- [Raz Vazheh](#) Farsi word puzzle game. Designed and developed solo (Unity)
- [Couples Yoga](#) (10M+ downloads)
- [Aurora](#) 3D puzzle game with heavy focus on art direction
- [Word Masters](#): A 2D casual mobile game.
- [Starla](#): An ARPG mobile game with inventory and quest systems
- [4Wheelers](#): Online multiplayer racing game with Photon
- Other Projects: [Doctor Tycoon](#), [Firefighter](#), [Power Wash Master](#) Hypercasual mobile games.
